What is Data Centricity?

It brings information together into one mainframe and makes the operations run smooth.

It is a process of data collection, data updation and its execution, which can be accessible from many points.

Data Centricity with NAAC Perspective

- The volume of data & information institute usually collect and store are increasing rapidly
- Centralization stores data or information in a particular location within a network
- It allows data from existing location to be collected and stored in a single drive for sharing, analysis or updating
- Centralized Data base can help to control data redundancy and inconsistency for security and sustainability

Note:

- The NAAC Portal supports only 5MB data. If the HEI's data exceeds 5MB, the HEI will host the supporting documents in the HEI's website and provide the link of the same in the template and/or in the HEI-DVV clarification Space)
The list of the documents is only suggestive. If the Institution has any other relevant documents besides those mentioned by NAAC, the same may be uploaded.
- For documents in regional language, kindly seek a attested translated version in English
- If the data is large, the HEI will fill the data template. During DVV clarification, the DVV to seek for sample selective documents for validation.
